CONTROLLED DISCLOSURE

When downloaded from the EDMS, this document is uncontrolled and the responsibility rests with the user to ensure it is in line with the authorised version on the system.

1. INTRODUCTION

This document establishes the standard technical evaluation criteria to be used when evaluating the submissions by prospective tenderer in response to formal Commercial Enquiries issued for various Eskom distribution systems equipment, hardware and fittings used on networks within Eskom Distribution.

This document details the technical strategy, method of evaluation and the evaluation criteria, which includes the Enquiry returnable necessary to conduct the desktop evaluation and the product sample evaluation where required.

2. SUPPORTING CLAUSES

2.1 SCOPE

The document contains the technical requirements and returnable for tenderers that wish to supply

2.1.1 Purpose

The aim of the document is to formalize the requirements that should be met by the tenderer of the product requested.

2.1.2 Applicability

This document shall apply in Eskom Holdings Limited Divisions LimLanga cluster.

2.2 NORMATIVE/INFORMATIVE REFERENCES

Parties using this document shall apply the most recent edition of the documents listed in the following paragraphs.

2.2.1 Normative

- [1] Occupational Health and Safety Act and Regulations (OHS Act);
- [2] 240-114967625, Operating Regulations for High Voltage Systems (ORHVS);
- [3] ISO 9001, 2000 Quality Management Systems;
- [4] D-DT-8012, Marker Cable Route Concrete;
- [5] 0.54/404, Electrical equipment enamelled labels details;
- [6] 240-82737065: MV/LV Pole Numbering;
- [7] DDT-5050: MV/LV Line Labelling;
- [8] 0.54/5577, Electrical equipment enamelled labels text layout;
- [9] 240-120804300, The Standard For The labelling Of Electrical Equipment within Eskom Wires Network.
- [10] 240-75660336, The Standard for Design, Manufacturing and Installation of Eskom Wires Business Equipment Labels;
- [11] 240-89556857, Distribution Group's Specific Representation Of Operating Diagrams In The Field – Station Electric Diagrams;
- [12] 240-62629353, Specification For Panel Labelling Standard
- [13] 240-56362221, Standard For Safety Signs Used In DC Applications
- [14] 240-103414344: Eskom Corporate Identity Manual– Section5: Signage;
- [15] 0.54/404: Electrical equipment enamelled labels details;

CONTROLLED DISCLOSURE

When downloaded from the EDMS, this document is uncontrolled and the responsibility rests with the user to ensure it is in line with the authorised version on the system.

- [16] 0.54/5577: Electrical equipment enamelled labels text layout;

[19] D-DT-5047: Substation primary plant label – Vitreous Enamel/Fibreglass manufacturing details
[20] D-DT-5047: Substation primary plant label – Chromadek / Chromaprep manufacturing details
[21] D-DT-5050: Sub-transmission line label – HV Line Designation & Structure Identification Label
[22] D-DT-5050: Sub-transmission line label – HV Line Crossing Label
[23] D-DT-5050: Low voltage line label – LV Structure Identification Label (Optional to D-DT-3049)
[24] D-DT_3202: Sign, Danger;
[25] Manufacturers manual.

2.2.2 Informative

- [1] [32-1034](#) - Eskom Procurement and Supply Chain Management Procedure
[2] [240-48929482](#) - Tender Engineering Evaluation Procedure
[3] [240-44682850](#) - Provide Engineering during Project Sourcing

2.3 DEFINITIONS

Definition	Description
Approved by	The accountability of the Approver of the document is equivalent to the specified role of Functional Responsible/Owner as identified in 240-53114186 and 32-6 for Documents and Records Management.
Functionality	The capability and capacity of a tenderer to provide goods or services in accordance with specifications as set out in the enquiry documents. Tenders evaluated on functionality must be carried out in accordance with 32-1034.
Procurement	Procurement is the process which creates, manages and fulfils contracts relating to the provision of goods, services and engineering and construction works or disposals, or any combination thereof.
Buyer's Guide	A list or catalogue of SAP numbers and associated material descriptions.
Desktop Evaluation	An evaluation of the documentation included in the tender returnable.
Mandatory Requirements	This are requirements that must be submitted by the tenderer, fail to provide any mandatory tender returnables as clearly specified in the tender enquiry, the tender submission will be deemed non-responsive.
Tenderer	A manufacturer or supplier who wishes to bid on the listed tender.

CONTROLLED DISCLOSURE

When downloaded from the EDMS, this document is uncontrolled and the responsibility rests with the user to ensure it is in line with the authorised version on the system.

Definition	Description
Schedule A	Minimum requirements stipulated by the purchaser i.e. Eskom
Schedule B	Offered by the manufacture in response to purchasers requirements

2.3.1 Disclosure Classification

Controlled disclosure: controlled disclosure to external parties (either enforced by law, or discretionary).

2.4 ABBREVIATIONS

Abbreviation	Description
ISO	International Standards Organisation
LOU	Limpopo Operating Unit
MOU	Mpumalanga Operating Unit
SANS	South African National Standards
SI	Standards Implementation (Department)

2.5 ROLES AND RESPONSIBILITIES

It is the responsibility of the procurement department to use the latest revision of this document before issuing this document to the market inquiry.

3. TECHNICAL TENDER REQUIREMENTS

3.1 TECHNICAL EVALUATION STRATEGY

The Technical Evaluation Team (as per 240-48929482) will evaluate the submissions.

The submissions shall be subjected to a progressive series of evaluation levels. Passing of each stage is a prerequisite for proceeding to the next evaluation stage.

The evaluation stages are as follows:

- Stage 1 Mandatory Requirements
- Stage 2 Functional Scoring Criteria
- Stage 3 Sample Evaluation Criteria (where applicable)

3.2 TENDER REQUIREMENTS

These requirements will be used to measure the tenderers ability to supply Eskom with what is required as stipulated in section 2.1 of this document in compliance with the specific requirements as stated in Eskom's Standards (240-75660336), Eskom's Buyer's Guide Documents, South African National Standards, International Standards listed under the normative references of this document.

FOR THIS INQUIRY ONLY STAGES 1 AND 2 ARE APPLICABLE.

CONTROLLED DISCLOSURE

When downloaded from the EDMS, this document is uncontrolled and the responsibility rests with the user to ensure it is in line with the authorised version on the system.

3.2.1 Stage 1: Mandatory Requirements

Table 1: Mandatory Requirements

Title	Requirement	Non - Compliance	Reference
Technical Schedules A&B	Technical schedules shall be filled, signed and submitted.	Failure to submit a completed and signed technical schedule.	Annex B
Deviation Schedule	The technical deviations sheet shall submit and signed. Where there is no deviation it shall be indicated as such in the deviation schedule.	Failure to submit a completed and signed deviation schedule form.	Annex C
Manufacturer Drawing ,Manual or Data Sheet	Manufacturer Drawing ,Manual or Data Sheet	Failure to submit a drawing and Manual which meets the requirements.	D-DT-5047 D-DT-5050
Type Test Report	Submission type test report. The type test report shall be from accredited test facility. The type test reports shall correspond to the manufacturer drawing. List critical type test Material and dimension verification test	Failure to submit all listed test reports	Annex A

3.2.2 Stage 2: Functional Scoring Criteria

Only tenderers that passed stage 1 shall be evaluated at stage 2. The tenderer needs to obtain a **minimum weighted score of 90** in order to pass this stage.

The following weights shall apply:

Table 2: Functional Score Distribution

Description	Weight
Content of the Technical Schedule A&B	50%
Manual/Manufacturer Drawing	40%
Evaluation of Type Test Report	10%

3.2.2.1 Functional Scoring Methodology

The following scoring methodology will be used to assess the tenderers submissions towards allocating scores for the functional criteria indicated in section 3.2.2.2 to 3.2.2.4.

CONTROLLED DISCLOSURE

When downloaded from the EDMS, this document is uncontrolled and the responsibility rests with the user to ensure it is in line with the authorised version on the system.

Table 3: Functional Scoring Methodology

Submission Assessment	Score Allocation
Compliant	100%
Compliant with associated qualifications	80%
Non-compliant with minimum risk	20%
Totally deficient or non-responsive or non-compliant	0%

3.2.2.2 Contents of the Technical Schedule A&B

Item	Description	Weight	Score allocation as per Table 3.
1.	Product information as per Clause 1 of the technical schedule A&B	10%	Compliant – 10% Compliant with associated qualifications – 8% Non-compliant with minimum risk – 2% Totally deficient or non-responsive or non-compliant – 0%
2.	Technical requirements as per Clause 2. of the technical schedule A&B	40%	Compliant – 40% Compliant with associated qualifications – 32% Non-compliant with minimum risk – 8% Totally deficient or non-responsive or non-compliant – 0%

3.2.2.3 Manual/Manufacturer Drawing

Item	Description	Weight	Score allocation as per Table 3.
1.	Detail drawing of a substation Labels	40%	Compliant – 30% Compliant with associated qualifications – 24% Non-compliant with minimum risk – 6% Totally deficient or non-responsive or non-compliant – 0%
2.	Detail drawing of a network equipment Label.	40%	Compliant – 20% Compliant with associated qualifications – 16%

CONTROLLED DISCLOSURE

When downloaded from the EDMS, this document is uncontrolled and the responsibility rests with the user to ensure it is in line with the authorised version on the system.

			Non-compliant with minimum risk – 4% Totally deficient or non-responsive or non-compliant – 0%
5.	Warranty Details and Period	20%	Compliant – 10% Compliant with associated qualifications – 8% Non-compliant with minimum risk – 2% Totally deficient or non-responsive or non-compliant – 0%

Note: The final calculation for Manual/Manufacturer Drawing = $\frac{\text{Total Score}}{100} * 40$

3.2.2.4 Evaluation of Type Test Report

Item	Description	Weight	Score allocation
1.	Tensile Type Test report accepted	5%	0 – No 5 - Yes
2.	Material and dimension verification test accepted	5%	0 – No 5 - Yes

4. REVISIONS

Date	Rev.	Compiler	Remarks
November 2021	1	DB Shabangu	First issue of Technical evaluation criteria document

5. DEVELOPMENT TEAM

The following people were involved in the development of this document:

- DB Shabangu
- Osie Oosthuizen

6. ACKNOWLEDGEMENTS

Stefan Terblanche
